Spider Delivers on Denver Residential Project

Seattle – Spider, a division of SafeWorks, LLC is in the midst of its second year of powered access work on the Park Lane High Rise Condominiums in Denver, Colorado.

Spider is supplying several unique U-shaped swing stages in varying configurations to enable Weathersure Systems, Inc. to perform restoration and painting work on the condominium's balconies. In addition, Spider is rigging all equipment throughout the numerous relocations required on the project.

The three Park Lane high rise structures present several access challenges. The protruding balconies require the use of specially engineered U-shaped platforms. The questionable strength of these balconies also presents obstacles, but Spider is working with professional engineers to deem them safe after shoring and also taking detailed precautions to ensure the structures' post tensioned cables are not disrupted during rigging maneuvers. Finally, in an effort to evoke as little disruption to the residents as possible, Spider is in constant communication with the building owners and tenants to ensure smooth transitions and continuous operation.

"As the market leader for over sixty years, Spider strives every day to go above and beyond our customers' expectations," states John Sotiroff, Vice President – Sales & Distribution. "Our Denver team is doing just that on the Park Lane project. Our custom engineering capabilities, expert rigging services and top-notch customer service is enabling the contractors on this project to safely and efficiently get the job done. Spider also understands the added sensitivity required on residential projects, which is why we keep our customers' customers – the residents – top of mind by limiting the disruption to their daily lives as much as possible."

About Spider:

Founded in 1946, Spider, a division of SafeWorks, LLC, created the powered suspended access business by introducing the well-known Spider basket. Since then, our product and service offering has expanded greatly to serve the needs of an ever-growing marketplace. Spider is the largest manufacturer and distributor of access and safety solutions in North America, serving more customers from more locations with a wider variety of products and services than any other company. From baskets, traction hoist and platform rental, to safety and training, to specialty engineered products - Spider has a strong team of professionals, along with a national network of sales, service and support capabilities to provide you with the most reliable access solutions available.
