

Curtain Wall Installation – Wichita, Kansas

Contractor: Western Building Group

Project Scope: Installation of curtain wall panels on new construction at the McConnell Air Force Base in Wichita, Kansas

Challenges:

- On-going jobsite activity prohibited the use of cranes on-site, which had been the customer's typical method of panel installation

Solutions: Spider configured a double-tiered 30-ft swingstage to enable the crew to simultaneously attach each panel at two elevations. Two Beta Max material hoists with top rollers and wireless remotes allowed precise positioning of the panels. Both the double-tiered swingstage and the material hoists traveled seamlessly along two 40-ft monorails, increasing productivity and efficiency on the jobsite. Spider provided Competent Person Training to Western Building Group's lead men and on-site training to the crews to ensure safe operation of the equipment.

About Spider:

Founded in 1947, Spider, a division of SafeWorks, created the powered suspended access business by introducing the well-known Spider basket. Since then, our product and service offering has expanded greatly to serve the needs of an ever-growing marketplace. Spider is the largest manufacturer and distributor of access and safety solutions in North America, serving more customers from more locations with a wider variety of products and services than any other company. From baskets, traction hoist and platform rental, to safety and training, to specialty-engineered products - Spider has a strong team of professionals, along with a national network of sales, service and support capabilities to provide you with the most reliable access solutions available.
