Spider Releases New Product Catalog

Seattle, WA - Spider, a division of SafeWorks, LLC, has recently released the most comprehensive product catalog in the suspended access industry.

Spider has compiled detailed information for its three primary product lines: temporary access products, safety solutions, and permanent installation equipment. In-depth content, including key features, specifications, drawings, photographs, and accessory lists, enables customers to choose the products that will most effectively meet their access and safety needs. Various case studies demonstrate how many of these products have been applied to real-life challenges and showcase Spider's diverse capabilities.

In addition, this new catalog will serve as a resourceful reference guide that customers can use on a daily basis. Regulations, usage guidelines, and training options assist customers in the proper use of their access equipment. Conversion tables, counterweight formulas, and a glossary of terms are easily accessible for answers to frequently asked questions in the suspended access industry. All of this information is available in print or on CD-ROM by submitting the electronic form found on www.spiderstaging.com.

About Spider:

Founded in 1946, Spider, a division of SafeWorks, LLC, created the powered suspended access business by introducing the well-known Spider basket. Since then, our product and service offering has expanded greatly to serve the needs of an ever-growing marketplace. Spider is the largest manufacturer and distributor of access and safety solutions in North America, serving more customers from more locations with a wider variety of products and services than any other company. From baskets, traction hoist and platform rental, to safety and training, to specialty engineered products - Spider has a strong team of professionals, along with a national network of sales, service and support capabilities to provide you with the most reliable access solutions available.
