Spider Provides Access Solution for MGM National Harbor in Maryland

Seattle – Spider, a division of SafeWorks, LLC, provided the suspended access solution for façade work during the construction of MGM National Harbor, the newest luxury hotel and casino resort in Maryland.

TSI Corporation turned to Spider to develop an access solution for the curtain wall and sunshade installations and glass replacements on the 24-story hotel. Spider provided five modular swing stages ranging in length from 40 to 60 feet, powered by SC1000 and SC1500 traction hoists, and rigged with 5x5 beams from the tall

roof level. Spider provided on-site user training to the crews to ensure the safe operation of the platforms, and an additional level of caution and precision was taken when the swing stages were rigged to operate over the large, delicate glass skylight that overlooked the atrium.

“I have been very happy with Spider’s performance on MGM,” commented Paul Welch, Superintendent with TSI Corporation. “Their ability to solve engineering challenges in a tough environment has been outstanding. Their product quality is excellent, their deliveries are on time and 100% complete, and their customer service is timely as they returned all calls within an hour. I highly recommend Spider for all swing stage rentals, and I fully intend to use them on upcoming work.”

MGM National Harbor is expected to open in the fourth quarter of 2016.

About Spider:

Founded in 1947, Spider, a division of SafeWorks, created the powered suspended access business by introducing the well-known Spider basket. Since then, our product and service offering has expanded greatly to serve the needs of an ever-growing marketplace. Spider is the largest manufacturer and distributor of access and safety solutions in North America, serving more customers from more locations with a wider variety of products and services than any other company. From baskets, traction hoist and platform rental, to safety and training, to specialty-engineered products - Spider has a strong team of professionals, along with a national network of sales, service and support capabilities to provide you with the most reliable access solutions available.
